

ANEMOMETER RE580F

Year 1
study

Description

Allows more detailed investigation of the wind speed before and after the turbine.

Related laws

- Wind speed

Learning capabilities

- Investigation of the change in air momentum before and after the generator:
- - When generating power
- - When not generating power
- Examination of approach velocity and turbine rotational speed (Tachometer required)

Essential Ancillaries

- RE580

Recommended Ancillaries

- RE580B
